PROFESSIONAL OVERVIEW

I am an aspiring software developer and Computer Science enthusiast who loves learning, creating, and growing in the tech space. My journey in technology has taught me resilience, creativity, and confidence. I enjoy building digital solutions, exploring new ideas, and inspiring other young girls to pursue careers in tech.

PROJECTS

Nyumbani Construction Works Website

- A Mobile Responsive Website For Nyumbani Construction Works, Listing Its Services And Projects And Allows Users To Book For Services Of Interest And Leave Reviews Besides Giving Nyumbani An Online Presence. This project's development stack is Python (Flask) and Javascript (React).
[view the site here](#)

Flask Inventory API

- An In-class Python Project That Allows Users To Adda New Product, Update A Product By Id, And Delete The Product. It isn't hosted but its a github repository.
[view the api here](#)

Book Management System

- An In-class Project That Allows Users To Add Books To Their Collection, Check Whether The Book Is Read Or Unread, Categorize The Book Into Favorite Or Not And Delete The Books They Add At Will. This project's development stack composed of html, CSS and Javascript. you can view the system [here](#)

Portfolio Website

- This Is A Portifolio Website I Developed For Myself As A Software Engineer. I used Basic Html, Css and a bit Of Javascript and hosted with Github Pages. You can view the system [here](#)
